PROFESSIONAL EXPERIENCE

Infrastructure Engineer (Platform) — SITA, Gurugram | Jan 2025 – Present

- Designed Internal Developer Platform with Backstage portal and service catalog, enabling self-service discovery and provisioning for 13+ microservices, reducing developer onboarding from 2 days to 2 hours.
- Authored 11 reusable Terraform modules for AKS, VNets, Application Gateways, and PostgreSQL Flex with versioned state management across 3 subscription tiers (dev, preprod, production).
- Implemented ArgoCD-based GitOps with App of Apps pattern and ApplicationSet for multi-environment promotion, enabling declarative deployments with automated drift detection across 5 environments.
- Enforced platform guardrails using OPA Gatekeeper policies on AKS — mandatory resource limits, approved container registries, required labels — preventing 30+ policy violations per sprint.
- Architected secrets management platform migrating from Helm values to Azure Key Vault with CSI Secret Store Driver, eliminating 100% of plaintext secrets and enforcing zero-trust policies.
- Deployed Istio service mesh and full observability stack (Prometheus, Grafana, Jaeger, Kiali) providing platform-wide visibility into resource utilization and service health.
- Drove platform cost optimization through automated cleanup, right-sizing, and weekly dashboards, reducing monthly Azure spend by 20%.

Senior Software Consultant (Platform/DevOps) — Knoldus Inc (NashTech Global), Noida | Nov 2021 – Dec 2024

- Built reusable Jenkins Shared Library pipelines serving 10+ teams, standardizing golden-path workflows and reducing pipeline duplication by 70%.
- Designed developer self-service workflows integrating SonarQube quality gates, Snyk/Mend scanning, and automated PR checks, reducing vulnerabilities reaching production by 90%.
- Migrated artifact management from JFrog Artifactory to GitHub Packages via automation, saving \$15K+ annually in licensing costs.
- Published Terraform modules to private registry via Azure Pipelines, enabling versioned, discoverable infrastructure components for cross-team consumption.

Data Engineer — REOMNIFY, Noida | Jan 2021 – Jun 2021
