Gurugram, Haryana, India

PROFESSIONAL SUMMARY

Site Reliability Engineer with 4.5+ years of experience ensuring production reliability, observability, and operational excellence for distributed microservices on Kubernetes (AKS/EKS). Deployed Prometheus/Grafana monitoring stacks with custom dashboards reducing MTTD by 60%, remediated 16 cloud security findings to achieve 100% compliance, and implemented cost optimization reducing monthly cloud spend by 20%. Skilled in incident response, infrastructure automation (Terraform, Ansible), CI/CD hardening, and service mesh observability (Kiali, Jaeger). Certified Google Cloud DevOps Engineer and Azure Network Engineer Associate. Awarded 2x SITA Bravo Awards for production delivery under pressure.

TECHNICAL SKILLS

Observability & Monitoring: Prometheus, Grafana, Loki, Azure Monitor, New Relic, Jaeger (Distributed Tracing), Kiali (Service Mesh)

Containers & Orchestration: Kubernetes (AKS, EKS), Docker, Helm Charts, Azure Container Registry

Infrastructure as Code: Terraform (Azure, AWS — 11 production modules), Ansible, GitOps

CI/CD & Automation: Azure DevOps Pipelines, Jenkins (Declarative, Scripted, Shared Libraries), GitHub Actions

Cloud Platforms: Azure (AKS, Key Vault, App Gateway, VNets, PostgreSQL Flex), AWS (EC2, S3, RDS, IAM, CloudFront, GuardDuty)

Security & Compliance: Azure Key Vault, CSI Secret Store Driver, Snyk, Mend, SonarQube, AWS GuardDuty, IAM Hardening

Scripting: Python, Bash (Shell Scripting), PowerShell

Tools: Git, Linux (Ubuntu), PagerDuty/Alerting, Incident Management

PROFESSIONAL EXPERIENCE

Infrastructure Engineer (SRE) — SITA, Gurugram | Jan 2025 – Present

- Deployed and operationalized Prometheus and Grafana monitoring stack on AKS with custom dashboards for infrastructure health, pod resource utilization, and application-level SLIs, reducing mean-time-to-detect (MTTD) by 60%.
- Integrated distributed tracing (Jaeger) and service mesh observability (Kiali) across 13 microservices, enabling root-cause analysis of latency regressions and inter-service failures within minutes.
- Provisioned and maintained production-grade AKS clusters, VNets, Application Gateways, and PostgreSQL Flexible Servers using 11 Terraform modules with state locking and drift detection across 3 environment tiers.
- Led secrets hardening initiative: migrated application credentials from Helm chart values to Azure Key Vault with CSI Secret Store Driver across 4 product charts, achieving zero-trust posture and eliminating all plaintext secrets in VCS.
- Remediated 16 AWS security findings (EC2, RDS, S3, CloudFront, IAM, GuardDuty) in Blockchain Sandbox account within 2 sprints, achieving 100% compliance with organizational security baselines.
- Architected CI/CD reliability: built multi-stage Azure DevOps pipelines for 13 repositories with automated rollback triggers, canary validation gates, and security scanning, supporting 50+ zero-downtime production deployments.
- Implemented cloud cost optimization through automated resource cleanup scripts, right-sizing analysis, and weekly cost control reporting dashboards, reducing monthly Azure spend by 20%.
- Automated container image supply chain security: PowerShell + Azure Pipeline workflows to scan, validate, and push third-party images to ACR, preventing untrusted images from reaching production.

Senior Software Consultant (DevOps/SRE) — Knoldus Inc (NashTech Global), Noida | Nov 2021 – Dec 2024

- Engineered Jenkins CI/CD pipelines with integrated SonarQube quality gates and Snyk/Mend security scanning for 10+ projects, achieving zero critical CVEs in production and reducing build-to-deploy time by 40%.
- Migrated artifact management from JFrog Artifactory to GitHub Packages, automating the transition with PowerShell and Azure Pipelines while maintaining artifact integrity and traceability.
- Implemented Ansible-based configuration management ensuring consistent server provisioning and drift prevention across 30+ instances in dev, staging, and production environments.
- Developed backend automation services on AWS EC2 using Python, REST APIs, and PostgreSQL for internal engineering evaluation platforms, handling 1K+ daily automated assessments.

Data Engineer — REOMNIFY, Noida | Jan 2021 – Jun 2021

- Built Python-based data extraction and transformation pipelines using REST APIs and Selenium, processing 10K+ records daily into PostgreSQL for downstream analytics and monitoring dashboards.

EDUCATION

B.Tech — ABESIT (AKTU) | Jul 2018 – Jun 2022

CGPA: 8.56 / 10.0 | First Division

Sainik School Gopalganj — PCMB (82.6%) | Jul 2017

CERTIFICATIONS

- Professional Cloud DevOps Engineer — Google Cloud Community India
- Microsoft Certified: Azure Network Engineer Associate — Microsoft
- AWS Cloud Training and Seminar Certificates — Amazon Web Services
- Python 3 Programming — Coursera

ACHIEVEMENTS

- Awarded 2x SITA Bravo Awards ("Step up for the Customer" and "Dare to Grow") for driving mission-critical deployments to completion under tight deadlines across distributed teams.
- Open-source contributor to Azure Verified Terraform Modules (PR #232) — Microsoft's official Terraform module registry.
